TOPPY

ENVIRONMENTAL
POLICY AND
OBJECTIVES

1 AGOSTO 2020

TOPPY SRI

TOPPY srl is fully aware that a responsible economic strategy, also aimed at environmental issues, is essential for its success and for the satisfaction of its customers.

Toppo is sensitive to environmental issues and commits the organization to achieving a reasonable and constant improvement of environmental efficiency through systematic analysis of the environmental aspects and impacts of its activities and the definition of improvement objectives aimed at minimizing the environmental risks associated with its activities and protecting the ecosystem in which we live.

The implementation and continuous improvement that Toppo aims for by implementing such a system involves all personnel, believing that the conservation and protection of the environment passes through the commitment of all.

Toppo srl commits to:

- the identification and, as far as deemed relevant and possible, the satisfaction of the expectations of the relevant interested parties;
- the use of processes and technologies that prevent and/or reduce impacts on the environment;
- the use of energy services from renewable sources;
- ensuring full compliance with current environmental laws and regulations applicable to the organization's activities;
- to evaluate and control the effects of activities that have an influence on the environment;
- to proactively assess the potential effects on the environment of all new activities and all new products and processes, promoting, as far as possible, products made with recycled materials;
- to optimize resource consumption;
- optimization of internal processes with a view to better use of consumable materials;
- to promote among employees at all levels a sense of responsibility towards the environment, communicating to them the necessary information for understanding the effects on the environment of their activities and thus stimulating an open dialogue with them;
- to raise awareness of environmental issues among its customers and other interested parties;
- to adapt resources and plan personnel training to achieve the set goals.

The Management therefore believes in the development of its productive activities oriented towards Sustainability and Environmental Compatibility, seeking the continuous improvement of its environmental performance in order to maintain a proper balance between social, environmental and economic responsibility, hoping that this purpose can materialize with tangible benefits for all company operators and the local community.
